

Looking for good opportunities

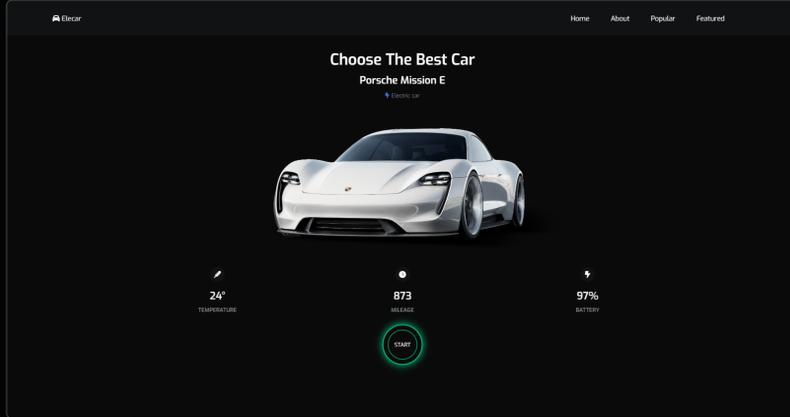

# Hi, im Valentin Gonzalez

Experienced Full-Stack Developer with a portfolio that covers numerous projects and professional engagements. Graduated with honors from ORT Argentina and currently studying Computer Science at the University of Buenos Aires.

# “Programming is about developing effective solutions”

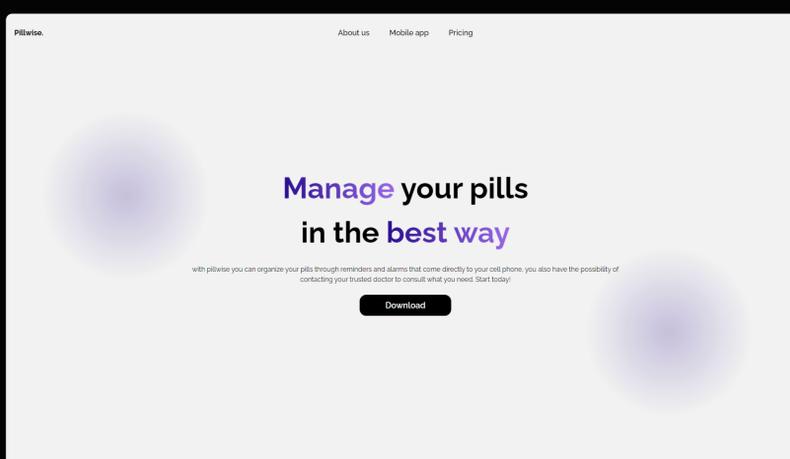

## My experience

February 2021

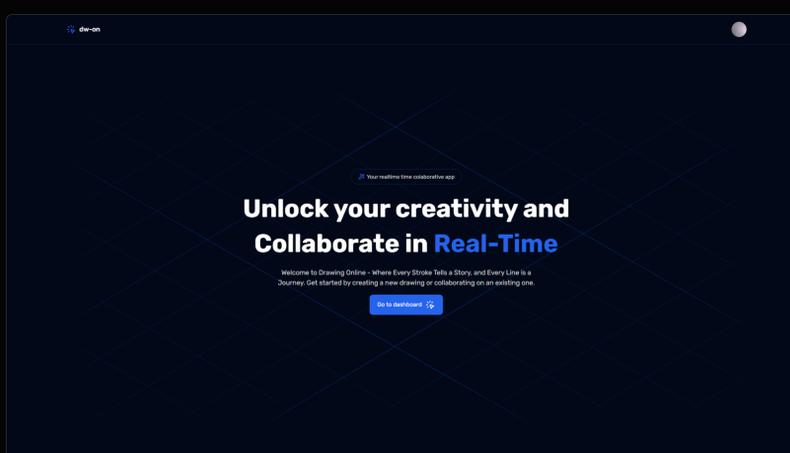

Here I began my journey as a web developer, starting to develop certain types of informative websites and learning new frameworks. Here we can see an example of the website i used to develop.

March 2022

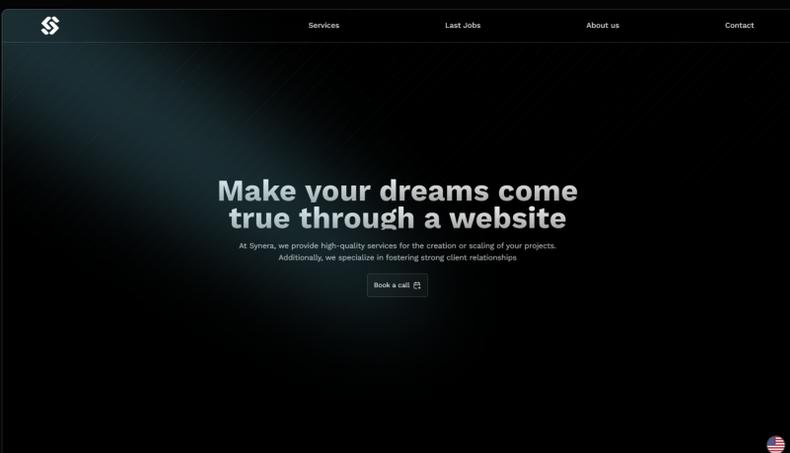

My first progressive web application for mobile called Pillwise, it aims to serve as a reminder for people to take their medications and keep track of them.

January 2023

Drawing Online is a real-time collaborative application where users can create diagrams, shapes, and drawings directly in the browser. Similar to Excalidraw or Paint, this intuitive and accessible tool fosters creativity and collaboration in visual projects effortlessly.

March 2024

Co-founder and lead developer at Synera, a digital agency dedicated to providing high-quality services for project creation, innovation, and scalability. Our expertise extends to cultivating robust client partnerships

Now

## About me

I am a highly empathetic and amicable individual who thrives in collaborative environments, particularly in leading teams to develop impactful projects. With a wealth of innovative ideas.

I am passionate about both teaching and learning new concepts. Continuously seeking to expand my knowledge base and acquire new tools, I am committed to personal and professional growth.
